

OM AUTADE

omautade22@gmail.com — +91 9511893457 — linkedin.com/in/om-autade

PROFESSIONAL SUMMARY

AI Engineer experienced in building scalable Python applications and integrating Generative AI into real-world systems. Skilled in developing LLM-powered services, agent-based AI solutions, and Retrieval-Augmented Generation (RAG). Proficient in backend APIs, intelligent automation, and agent-to-agent (A2A) communication, MCP.

PROFESSIONAL EXPERIENCE

LTIMindtree
Software Engineer

Pune, MH
June 2023 – Present

AI Platform – Multi-Cloud Pricing Intelligence

- Built a GenAI-driven pricing intelligence platform aggregating real-time cost data from AWS, Azure, and GCP via cloud pricing APIs
- Developed a Multi-Cloud Pricing Agent using LLMs to fetch, normalize, and compare infrastructure pricing across providers
- Designed scalable microservices using Flask and FastMCP for pricing orchestration and LLM integration
- Enabled cost comparison, service-level pricing insights, and intent-based pricing queries
- Tech Stack: Python, Flask, FastMCP, OpenAI APIs, AWS/Azure/GCP Pricing APIs

Intelligent Knowledge Base Agent – RAG Platform (SharePoint)

- Built an AI-powered Knowledge Base Agent enabling natural-language, context-aware Q&A over enterprise SharePoint content
- Designed and implemented an end-to-end RAG system with automated ingestion, semantic retrieval, and LLM-based response generation
- Enabled multimodal understanding by transforming documents, diagrams, and architecture flows into semantic embeddings to improve retrieval accuracy and reduce hallucinations
- Exposed production-grade FastAPI services for knowledge ingestion, retrieval, and agent orchestration
- Tech Stack: Python, FastAPI, Microsoft Graph API, Azure OpenAI (GPT-4 Vision), Nomic Embed Text Model, ChromaDB

Intelligent Ticket Routing Agent

- Developed AI-powered Ticket Routing Agent with Assignment Group Recommender to analyze ticket metadata and automate routing
- Implemented Assignee Recommender evaluating engineer workload, expertise, and performance metrics
- Built Escalation Recommender predicting and triggering escalations based on issue severity and resolution patterns
- Tech Stack: Python, FastAPI, OpenAI LLMs, LangChain

URL Sanity Check Automation

- Developed RPA solution using Python and Playwright to validate website accessibility and performance
- Automated recovery workflows and integrated PowerShell scripts for system maintenance
- Implemented automated pod scaling on OpenShift to improve system reliability and uptime
- Tech Stack: Python, Playwright, PowerShell, OpenShift, Kubernetes

PERSONAL PROJECTS

AI Chatbot with Cohere LLM

- Developed and deployed production-ready AI chatbot powered by Cohere's large language model
- Tech Stack: Cohere LLM, FastAPI, React, Python, JavaScript

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, SQL, PowerShell
- **Frameworks & Libraries:** FastAPI, Flask, Spring Boot, LangChain
- **AI:** OpenAI GPT APIs, Ollama, RAG, Vector Databases (Chroma), Model Context Protocol (MCP)
- **Databases:** PostgreSQL, MySQL, MongoDB, ChromaDB
- **Tools:** Git, Docker, Kubernetes, Postman, Playwright, OpenShift

EDUCATION

AISSMS Institute of Information Technology
B.E., Computer Engineering
CGPA: 8.33/10.0

Pune, MH
2019–2023

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications:** Google Cloud Digital Leader, IT Essentials, ITOPs Training, AI For Everyone (Coursera)
- **Achievements:** Received "Exceptional Contributor Award" and "Star Performer" at LTIMindtree for outstanding performance and innovation in AI projects
- **Languages:** English (Professional Proficiency), Hindi (Professional Proficiency), Marathi (Native)
